Dankwoord

Dankwoord

Graag wil ik eenieder bedanken, die op wat voor manier dan ook een bijdrage heeft geleverd aan dit proefschrift. Met de volgende woorden wil ik er een aantal mensen uitlichten, die een bijzondere bijdrage hebben geleverd aan de totstandkoming van dit proefschrift.

Graag wil ik alle ouders en kinderen die hebben meegewerkt aan de studie bedanken. Zowel in de neonatale periode als op de leeftijd van 1,2 en 6 jaar konden wij op jullie rekenen. Zonder jullie zou dit onderzoek onmogelijk zijn geweest!

Prof. dr. W.P.F. Fetter, promotor en opleider kindergeneeskunde VU Medisch Centrum. Beste Willem, graag wil ik je bedanken voor alle mogelijkheden die je me hebt gegeven als Masterclass-student, daarna als ANIOS kindergeneeskunde en later als AIOS kindergeneeskunde en daarnaast als onderzoeker. Wij delen de mening dat het uitvoeren van follow-up onderzoek bij prematuren een must is. Het liefst met een grote bus vol ex-prematuren naar Den Haag om meer aandacht te krijgen voor onderzoek naar deze groep kinderen... ik ga graag mee!

Dr. R.M. van Elburg, copromotor. Beste Ruurd, vanaf het begin (in 2002) ben jij er geweest om mij te begeleiden. Dat het geen regulier traject is geworden en dat we er een boekje van hebben kunnen maken heb ik zeker ook aan jou te danken. Jouw enthousiasme heeft me geïnspireerd om elke keer weer een hoofdstuk te schrijven. Je hebt je al die jaren voor me ingezet en het onder meer mogelijk gemaakt dat ik op diverse congressen in binnen- en buitenland heb mogen presenteren. Ook rondom mijn sollicitaties heb je je voor me ingezet en bij het creëren van ruimte om naast mijn opleiding aan dit onderzoek te werken. Bedankt, ik heb ontzettend veel van je geleerd.

Dr. A. van den Berg. Beste Anemone, als student ben ik bij je gekomen en in de afgelopen jaren heb ik ontzettend veel van je mogen leren. Jouw kritische blik en jouw nauwkeurigheid zijn eigenschappen waar velen jaloers op kunnen zijn. Naar mijn idee de juiste kwaliteiten voor een wetenschapper. Het zijn naast leerzame ook gezellige jaren geweest, dank daarvoor.

Leden van de promotie- en leescommissie, Prof. dr. J.B. van Goudoever, Prof. dr. H.S.A. Heymans, Prof. dr. H.N. Lafeber, Prof. dr. J. Neu, Prof. dr. E.E.S. Nieuwenhuis, Prof. dr. H.A. Moll, Prof. dr. J. Oosterlaan en Prof. dr. J. Garssen wil ik hartelijk danken voor de tijd en aandacht die zij hebben gestoken in de beoordeling van mijn proefschrift.

Prof. dr. M. Broers, hoofd van de Masterclass/ het Honours-programme. Geachte Professor Broers, voor mij is het allemaal begonnen op het moment dat ik werd aangenomen voor de

Masterclass. Op dat moment durfden wij niet te dromen dat het tot een proefschrift zou komen. U wil ik bedanken voor de kans die u me hiertoe heeft gegeven.

Dr. C. de Vries, u heeft mij op weg geholpen binnen de Masterclass, dank daarvoor.

Prof. dr. J.J. Roord, hoofd van de afdeling Kindergeneeskunde van het VU medisch centrum en voorzitter. Hartelijk dank voor alle mogelijkheden die u mij geboden heeft.

Prof. dr. J. Neu, thank you very much for your help with our manuscript on long-term effects of glutamine supplementation in VLBW infants. Your advice was very helpful. Furthermore, I am honoured to have you in the committee.

Dr. J. Huisman, bedankt voor uw hulp bij het artikel over de neuro-motore ontwikkeling bij 18 maanden.

Dr. J. Vermeulen, beste Jeroen, bedankt voor al je inzet en adviezen bij het artikel over de neuro-motore ontwikkeling van ons cohort op de leeftijd van 18 maanden.

Vanja Hofman, ontzettend bedankt voor al je inzet bij het afnemen van de Bayley Scales.

Dr. J. Knol en E. van der Linde, bedankt voor jullie hulp bij alle analyses van de ontlastingsmonsters en het artikel over de darmflora.

Prof. dr. E. Nieuwenhuis, bedankt voor uw hulp bij het artikel over de cytokines.

Prof. dr. H. Moll, hartelijk dank voor uw hulp en adviezen bij de artikelen over allergieën en infecties.

Prof. dr. J.W.R. Twisk, beste Jos. Dankzij jou zijn alle analyses niet alleen begrijpelijk geworden maar ook nog eens interessant.

Ad Nagelkerke, beste Ad. Bedankt voor al jouw goede adviezen als mentor. Je hebt je er onder meer voor ingezet dat ik naast mijn opleiding ook tijd heb gekregen om aan dit proefschrift te werken. Dat waardeer ik zeer, evenals je nuchtere kijk op het leven.

Paranimfen, Willemijn en Ilse.

Lieve Willemijn, we weten allebei dat als jij mij 16 jaar geleden niet de basisprincipes van de scheikunde had uitgelegd, ik hier nooit zou staan! Het feit dat we elkaar al zo ontzettend lang kennen en dat je vandaag naast me staat vind ik heel speciaal. Ilse, wij zitten al enige jaren

in hetzelfde “onderzoeksschuitje”. Dat maakt dat we elkaar heel goed begrijpen en dezelfde diepte-, maar ook zeker hoogtepunten doormaken! Ik vind het heel fijn dat ook jij over enkele maanden zult promoveren en dat we verder samen zullen werken als AIOS kindergeneeskunde, wie weet wat de toekomst nog brengt!

Arts-assistenten in het Vumc en in het Spaarneziekenhuis, bedankt voor jullie flexibiliteit tijdens de laatste fase van dit proefschrift.

Lieve vriendinnen, Tineke, Laura, Nina, Jantina, Gemma, Laurien, Marion, Kim, Indra, Janneke en Regina, dankzij jullie was de studietijd onvergetelijk. In moeilijke en makkelijke tijden zijn we er voor elkaar!

Papa, jij bent op het moment dat ik mijn artsentitel kreeg, om die reden, gestopt met roken. Dat waardeer ik zeer en je hebt het volgehouden ook! Bedankt voor alles en voor het feit dat je er bent vandaag.

Mama, jij staat altijd voor me klaar om me advies te geven. Bedankt voor alle mogelijkheden en vertrouwen dat je me hebt gegeven en ook voor het feit dat je er bent vandaag.

Marjolein, zuster en moeder van mijn liefste neefje Maurits en kersverse nichtje Annemarijn, in moeilijke en makkelijke tijden zijn we er altijd voor elkaar. We lijken niet voor niets zo op elkaar, bedankt voor alle steun en alle adviezen.

Erik, broer(tje), of je nu in Amsterdam was of in het verre Azië, zodra het nodig was bood jij een helpende hand met verloren documenten! Bedankt.

Laurens, samen kunnen wij de wereld aan. Bedankt dat je er bent, jij bent “the love of my life”.

Curriculum vitae

Curriculum vitae

Annelies van Zwol was born on December 30th, 1978 in Enkhuizen, the Netherlands. She graduated from secondary school (Atheneum) at het Martinus College in Grootebroek in 1998. Due to the *numerus fixus* she was not able to start medical school that year. Therefore she started the study Medical Biology (VU University Amsterdam), after obtaining her propedeuse she switched to Physical Therapy (Hogeschool van Utrecht) and combined this with Human Movement Sciences (VU University Amsterdam). In 2000 she started her medical training at the VU University, Amsterdam. In 2002 she started with the Masterclass/Honours Program. As part of the Masterclass she worked on a research project at the department of pediatrics, division of neonatology of the VU University Medical Center, under supervision of prof. dr. W.P.F. Fetter, dr. R.M. van Elburg and dr. A van den Berg. After obtaining her masters of medicine she worked (from October 2004 till December 2004) on a research project at the neonatal intensive care unit in Memphis, Tennessee, USA, supervised by R.J. Cooke. From February 2005 till April 2005 she travelled to Banda Aceh, Indonesia together with Laurens van der Plaat to offer medical relief to Tsunami (26th December 2004) victims. In 2007 she obtained her medical degree (Cum Laude) and after that she worked as a resident (ANIOS) in pediatrics in the Onze Lieve Vrouwe Gasthuis, (head dr. D. Bosman) Amsterdam. She started her residency in pediatrics (AIO) in October 2008 at the VU University Medical Center (head prof. dr. W.P.F. Fetter). During medical school, her internships and her work as a resident she worked on this thesis, entitled "Glutamine-enriched enteral nutrition in very low birth weight infants, six years of follow-up."
